IT Support / Computer Repair

Full computer and IT support for your residence, home-based office, or small business.

We come to you, and we have since 1998! We don't sell computers, or anything else. Our job is to act as your personal IT advocate. If you need a computer replacement, parts or peripherals, we will source the best product that will meet your needs and budget. Our time is your time. Our service area is limited so call for information.

Services Include

- **Windows AND Apple**
- **Diagnostics & Repair Service**
- **IT Consulting Support**
- **Digital Document Management Solutions**
- **Backup & Disaster Planning**
- **Home and Business Network Planning**
- ***FREE! Electronics Removal & Disposal**

As of January 1, 2015, GLD Enterprises Communications officially merged with our sister company, "Deer Computer Consulting, Ltd.," one of the first on-site computer services in the State of Ohio.

One of the most important components of business communications is technology. Without properly functioning computers, Wi-Fi networks, email and so on, there can be no communication in or out of your business. We can help!

With more than two decades of experience in support of all types of computer systems from the most basic home PC to sophisticated server-controlled networks, GLD Enterprises Communications has the knowledge to keep you up and running. We don't have "geeks" and there won't be a clown car pulling up at your door. But you can rest assured that you are getting the best service and support in the industry.

We have no store front nor do we carry massive overhead. We focus on quality service with the CUSTOMER as the primary concern, not the technology. We do what is necessary to meet your specific need.

Owner, Gery L. Deer is the featured guest technology expert on the WDTN-TV2 daytime program, Living Dayton.

CALL TODAY! (937) 902-4857

**Free electronics disposal does not include security wipe of hard disk drives. We do not take printers, keyboards, or CRT monitors.*
